VROOOM!

A HUGE THANKS to the **Terre Haute Convention & Visitors Bureau (THCVB)** for their partnership in helping prepare for and promote the National race. They were able to provide: bleachers, tent, simulators, and billboards.

In addition, the THCVB was also able to finance some last minute improvements to the grounds through a grant. A major requirement of the grant was that it had to be used to help attract and retain a major event that brought people from multiple states and had a measurable impact on the local economy. These improvements included: several additional loads of whiterock, hauling of millings from an anonymous donor, professional excavation of whiterock and millings with a focus on eliminating potential mud challenges.

FoTHQMA is willing to be the backup if any line item is exceeded in the grant.

National Race

A huge THANK YOU to all members for a successful 2021 USAC national race. USAC complimented our club for the hard work from our members and the amazing track surface. We couldn't have done it without all our members.

FoTHQMA is also willing to work with the THCVB on future grants so there is no expense to THQMA on these larger projects. Additional spectator shade (including ADA) and continuing to reduce mud challenges are key focuses for future grant opportunities. Thank you THCVB for thinking of us when writing these competitive grants.
